

# BUCYRUS-EAST BUCYRUS AREA IMPROVEMENTS PROJECT

AEP Ohio representatives plan power grid upgrades in Crawford County. The project involves building new power lines, updating existing power lines and removal of others. Upgrades ensure the power grid complies with company standards. Company representatives anticipate construction to begin early 2028 and conclude spring 2029.

## WHAT

The project involves:

- Rebuilding about 3 miles of power line.
- Building about 1 mile of power line.
- Removing about 1 mile of transmission facilities.

## WHY

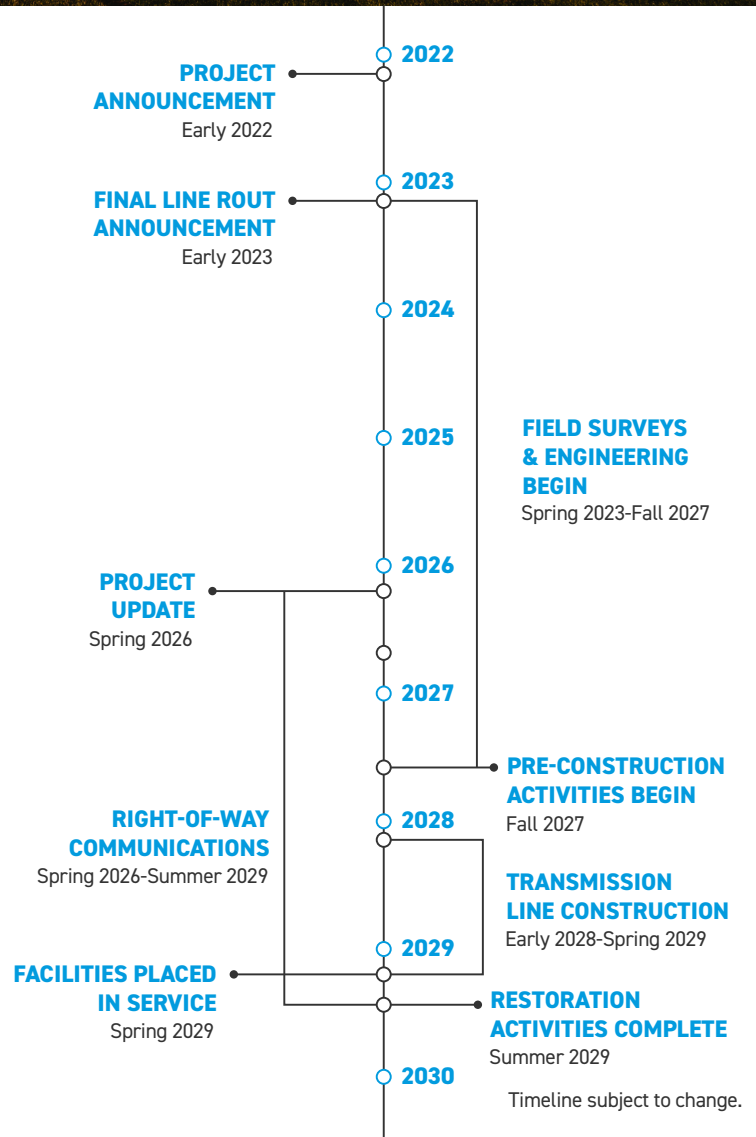

Upgrading the transmission infrastructure ensures the power grid meets current company standards and can support the area's need for reliable power. Replacing the electric wire meets the need for PJM, the regional transmission operator who oversees the transmission grid. Existing poles installed in the late 1990s cannot support the new, larger wire planned for the project. Company representatives plan to install new poles and wire to upgrade the power grid.

## WHERE

The project area includes:

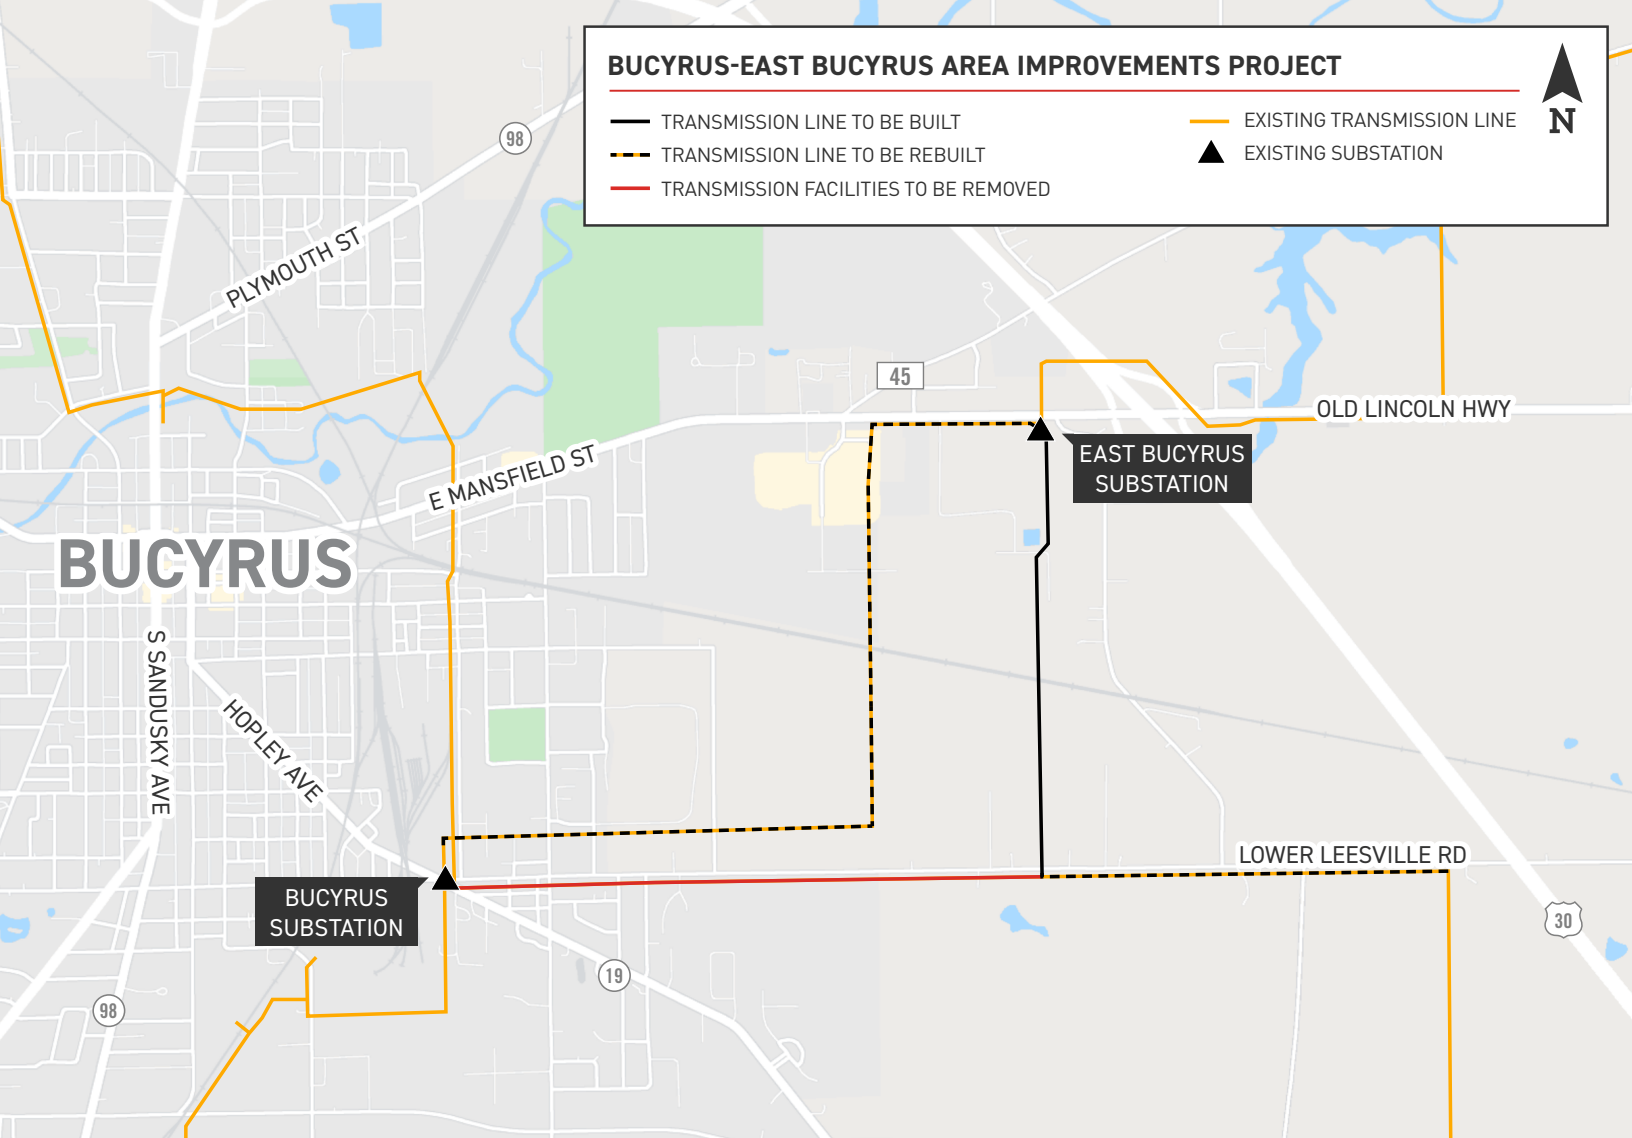

- Bucyrus and Whetstone townships in Crawford County.
- City of Bucyrus.

Company representatives plan to build the power line in a 60-foot right-of-way corridor to ensure the safe construction, operation and maintenance of the line.

# BUCYRUS-EAST BUCYRUS AREA IMPROVEMENTS PROJECT

-  TRANSMISSION LINE TO BE BUILT
-  TRANSMISSION LINE TO BE REBUILT
-  TRANSMISSION FACILITIES TO BE REMOVED
-  EXISTING TRANSMISSION LINE
-  EXISTING SUBSTATION

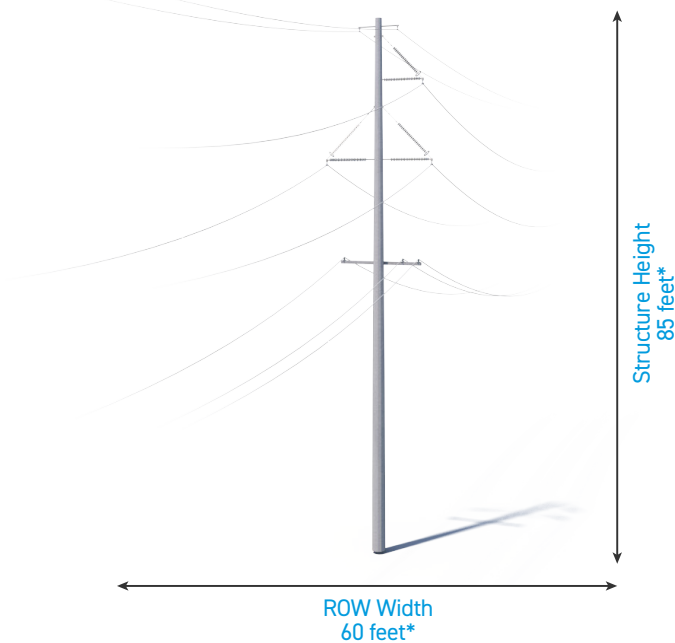

## TYPICAL STRUCTURES

The project involves the use of single steel poles.

Pole Height: [Approximately 85 feet\\*](#)

Right-of-Way Width: [60 feet\\*](#)

\*Exact structure height and right-of-way requirements may vary.
